COGNIZANT

Data Modeling:

- **Total 3 Tables are given which includes data to utilize.**
- **All the data available in the tables will be used.**

Strategic Planning:

- **1. Data Preparation:**
  - **Use the data model to merge the data and clean the data.**

- **2. Feature Engineering:**
  - **Create new features.**
  - **Transform the data into a suitable format for machine learning.**

- **3. Model Building:**
  - **Test algorithms with cross-validation.**
  - **Measure performance metrics.**
